

### **Rubber Extrusion Rubber Seal Strip Gasket For Windows**

The seal has the characteristics of non-combustible, non-explosive, water resistance, oil resistance, chemical corrosion resistance, non-toxic and good mechanical strength, high fire resistance, in the simulation of combustion experiment, the flame temperature of higher energy tolerance up to 800 degrees is still not deformation, with good fire resistance, at the same time in daily life, it also plays a sound insulation,

dust, anti-freeze and warm.

#### **Product Parameter of the Rubber Extrusion Rubber Seal Strip Gasket For Windows:**

- ①Product name: Black EPDM Car Headlight Rubber Cover
- ②Material: EPDM NBR Silicon or Can Custom
- ③Logo: Can Custom
- ④Size: Can Custom
- ⑤Can Custom: Black or custom
- ⑥Application: Automotive
- ⑦Certifications: IATF16949 ,ISO14001:2015,ROHS,CMC, etc
- ⑧Delivery: 30 -50days after sample confirmation
- ⑨Sample: 25-30 days
- ⑩Payment: 30% deposit, 70% payment before shipment
- ⑪Package: PE bags, Cartons,Pallet
- ⑫Payment Terms: T/T,L/C and so on.
- ⑬Shipment Way: Vessel,Air,Express etc.

#### **Product Feature AND Application of the Rubber Extrusion Rubber Seal Strip Gasket For Windows:**

The seal is a kind of rubber strip used for fire and smoke prevention, mainly attached to the doors and Windows, the fire damage to human is very great, so it is essential to have good fire related materials, let us seal manufacturers to briefly say the characteristics of the seal, it is a kind of fire insulation material, but also an essential part of the fire door.

Door and window sealing rubber strip, mainly installed in steel and wood doors and door between the door and the door frame, door and door. In the event of a fire, the fire expansion seal will expand at a certain temperature. Then fill the gap between the original fire strip and the door gap, block the air circulation of the two Spaces. Play a good sealing role, prevent toxic gas and flame harm to the human

body, effectively prevent the spread of smoke and fire.

**Packaging & Delivery:**

Packaging Details: plastic bags or carton boxes

**WHY CHOOSE US****FAQ**

Q1. Which kind of product do you produce?

Kingtom: Rubber injection parts, rubber compression parts and rubber extrusion parts, rubber-metal parts, plastic parts.

Q2. What information do you need for making price?

Kingtom:1.2D/3D drawing,or samples photo with detail size.

2.Material And Material hardness

3.Detail quantity

4.Your other requirements like tolerance,surface treatment.

5.Product usage environment

Q3.I don't have 3D drawing,how should i do ?

Kingtom:You can send one sample to us,then we can produce as your sample.

Q4:How to make sure the quality?

Kingtom:Check the samples before mass production.

There is the detail inspection report and goods photos before shipping.

Q5.Do you provide samples?

Kingtom:Yes,samples is free and you just pay the express cost.

Q6.How is the delivery time?

Kingtom:It usually takes 10-30days.It depends on the orders.
